Feelly (07)

"Caring for the mind begins with understanding yourself." This application is designed to be a "companion for the heart", especially for young people and the new generation who may often feel stressed, anxious, or lonely but have no one to share their feelings with.

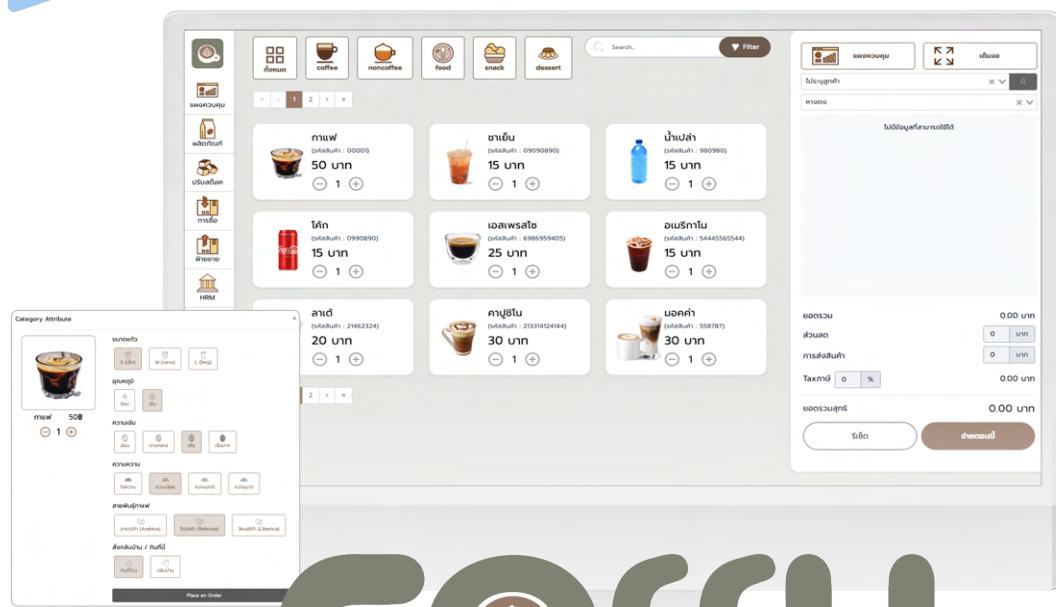

The app focuses on empathetic conversations powered by AI, along with tools to support emotional well-being in daily life. Its goal is to help foster positive mental health and reduce the risks of developing psychological issues.

(08)

Maffact (from Maintenance for Factory) is a dedicated maintenance and management program designed to simplify factory operations. It enables factories to track equipment status, schedule preventive maintenance, manage spare parts and resources, and record all – maintenance activities systematically. With Maffact, factories can reduce downtime, boost efficiency, and optimize costs more effectively.

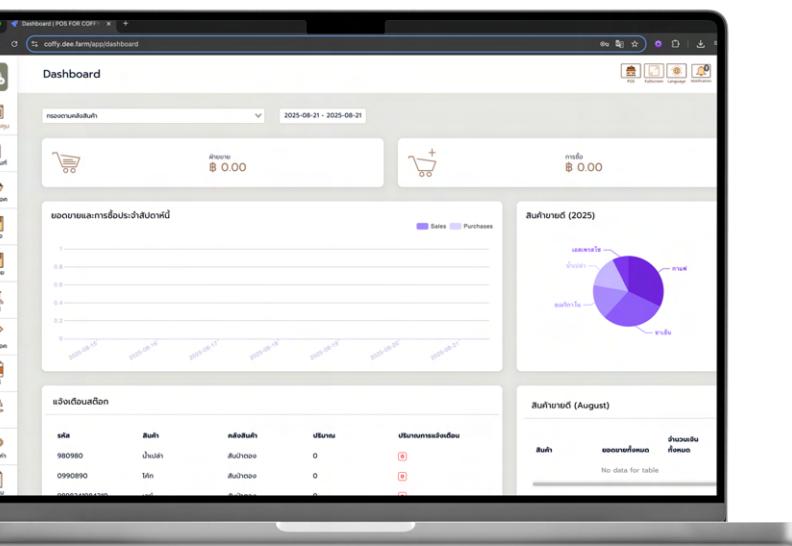

coffy

pos for coffee shop

(09)

Coffy is a web platform and POS system designed for coffee shops and café businesses. It streamlines sales and in-store operations by managing menus, inventory, and orders efficiently. With real-time sales analytics and customer insights, Coffy empowers café owners to run their business smoothly while delivering a better customer experience.
